

# Pharma intelligence

informa

**We bring confidence to your innovation...**

More and more drug discovery is being done at academic institutions meaning universities need the same high quality and credible information being used by the leading global healthcare corporations. Academics and researchers require high value and reliable information in order to make astute research decisions which in turn can attract funding opportunities.

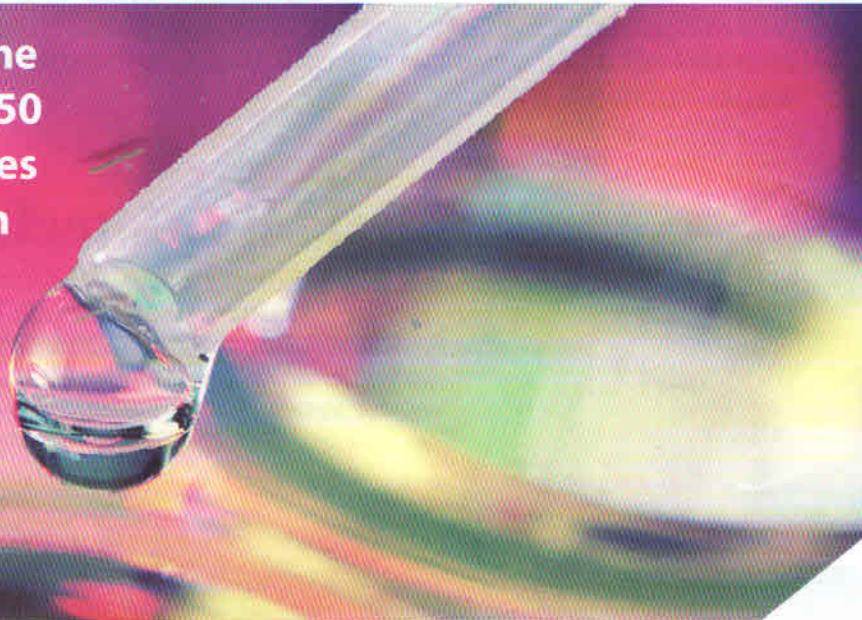

From classrooms & labs, clinical trials, early phase & portfolio decisions to clinical R&D we offer a suite of complimentary subscription news, data and analysis services.

Our Pharma intelligence products will ensure your academic researchers have the accurate, relevant and applicable content needed to enhance their educational experience and prepare them for the real-world

**Informa Pharma intelligence is the trusted partner of all of the top 50 global pharmaceutical companies and the top 10 contract research organizations.**

Datamonitor Healthcare combines rigorous primary research and validated secondary data together with high quality epidemiology to deliver the key statistics that are necessary in early phase clinical development. Primary research is translated into local languages to prevent bias with key opinion leaders and influencers confirming trends and forecasts. Our ability to react to and update event sensitive data in real-time, rather than the typical one-to-three year publication cycle, empowers your research institution to always be one step ahead
